Teach Family Medicine!

The Sioux Falls Family Medicine Residency (www.siouxfallsfpr.org) is looking for enthusiastic Family Physicians to join our faculty and shape the next generation of physicians.

Well-established 9-9-9 program, founded just 4 years after our specialty was born. We have over 350 graduates; 80% practice in South Dakota or bordering states (40% of South Dakota's family physicians are our alumni). Two-thirds of recent graduates entered rural practice.

Joining a faculty of **wide-ranging and diverse interests**, you will have the opportunity to practice full-spectrum care, develop new skills, and pursue your own special interests. While you will maintain your personal patient panel, the majority of your time (at least 60%) will be dedicated to educational efforts of teaching, mentoring, curricular innovation, scholarship, and administration.

Affiliated with the University of South Dakota Sanford School of Medicine, you will have an **academic appointment** at the school. The residency is sponsored by the Center for Family Medicine, a not-for-profit educational corporation that is financially supported by both Avera Health and Sanford Health. Our educational program and activities are **highly valued and strongly supported** by the local health care community.

Compensation includes a salary in the \$230K range, a \$100K "academic service loan" (a portion forgiven for each year of service), retirement, health/disability/life insurance, etc.
